How SOUNDLINA™ works

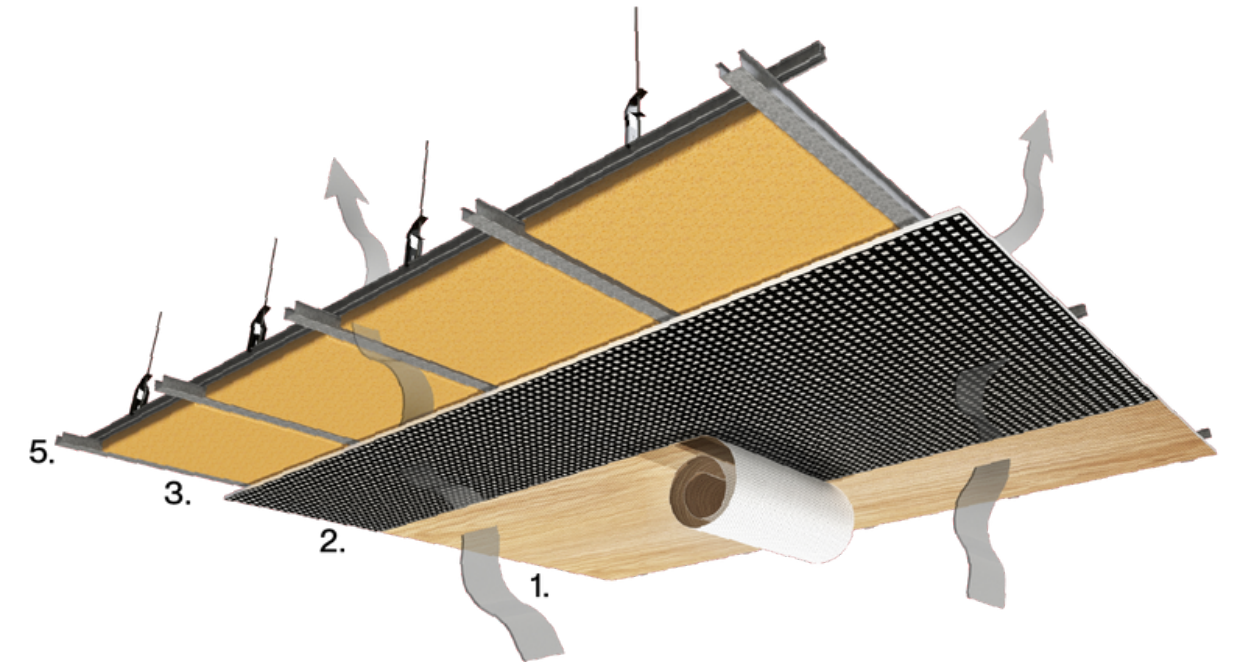

SOUNDLINA™ perforated wallpaper reduces echo by allowing sound to travel through its subtle perforations to the perforated grid plasterboard (painted black for aesthetics), where the acoustic insulation absorbs it.

Tested to achieve 0.85 NRC when installed as recommended on 12/25mm perforated grid plasterboard with acoustic insulation 14kg/m³.

SOUNDLINA™ wall installation

SOUNDLINA™ ceiling installation

1. SOUNDLINA™ perforated wallpaper
2. Perforated grid plasterboard 12/25mm (painted black for aesthetics)
3. Acoustic insulation 14kg/m³
4. Stud wall
5. Suitable suspended ceiling system

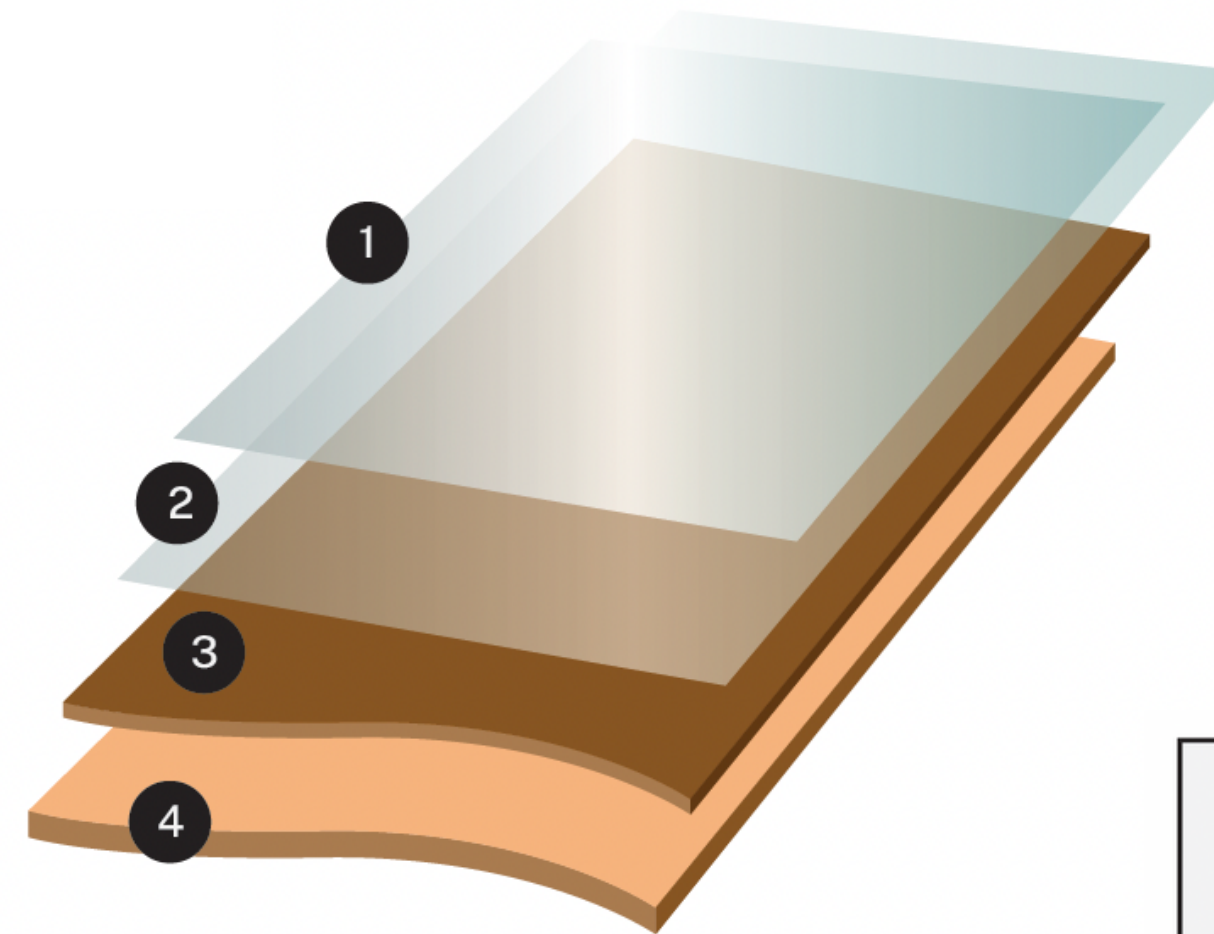

Diamond strength for ultimate durability

NAVURBAN Diamond™ uses innovative Smart NANO™ Technology. A top coat of resin is applied and cured to the decorative surface using UV (Ultra Violet) light.

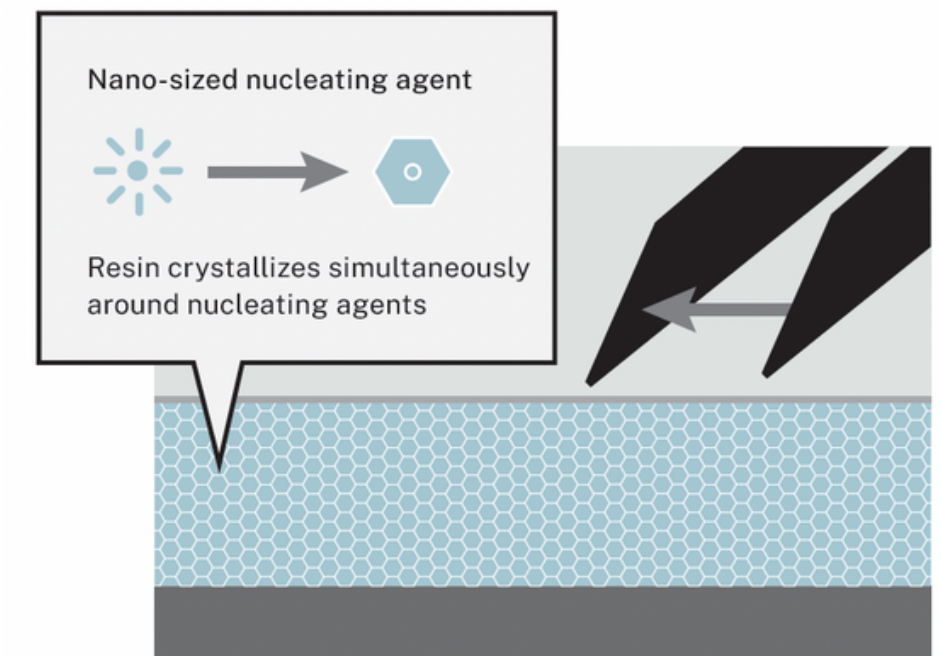

The surface's non-PVC olefin film is 3D-embossed with a textural woodgrain structure to evoke a beautiful natural aesthetic.

NAVURBAN Diamond™ Smart NANO™ Technology.

- ① UV top coating
- ② Transparent Non-PVC layer with Smart NANO Technology
- ③ Printed layer
- ④ Non-PVC base film

NAVURBAN Diamond™ Decorative surface with Smart NANO™ Technology

Low maintenance

Unlike wood veneers that require annual oiling, SOUNDLINA™ is easy to maintain. Simply wipe down any marks with a damp cloth for a quick clean.

The NAVURBAN Diamond™ finish is UV stable and scratch, abrasion, stain and water resistant, ensuring longevity and durability.

SCREENWOOD
SOUNDLINA

Made to enhance wellbeing

SOUNDLINA™ is available in woodgrain with a choice of fourteen NAVURBAN Diamond™ finishes.

Our woodgrain finish adds warmth and beauty to spaces, connecting people to nature while caring for their wellbeing.

Colour compatible

SOUNDLINA™ is a compatible colour match to the range of pre-finished Screenwood woodgrain products (and that of our trusted partner NAV) making decorative transitions seamless.

Screenwood products include:

PANELS

MODULO®

STIX®

Easy install - no joiner required

SOUNDLINA™ can be quickly and easily installed by a partition wall and ceiling contractor, as shown in this installation video.

SOUNDLINA™ is easily applied to grid plasterboard walls, ceilings, corners, and curved surfaces. It requires no shop drawings, pattern matching or specific sequencing.*

*With the exception of Classic American Oak

About Screenwood

Screenwood empowers visionary interior architecture by championing the principles of strength, utility, and beauty in architectural and acoustic decorative lining innovations.

As designers and manufacturers, we strive to create a positive impact through technical expertise, master craftsmanship, and genuine care for people and the planet.

Since our foundation, we've collaborated with some of the world's leading interior architects, designers, and builders, shaping rich and sustainable spatial experiences that enhance comfort, wellbeing, and a connection to our natural world.

We're proud to earn customer trust through consistency, delivering meticulously engineered products and systems that set the benchmark in performance, cost-effectiveness and ease of installation.
