Product Quick Guide

# Soundlina®

Perforated wall covering for superior fire protection, high acoustic comfort, and aesthetics.

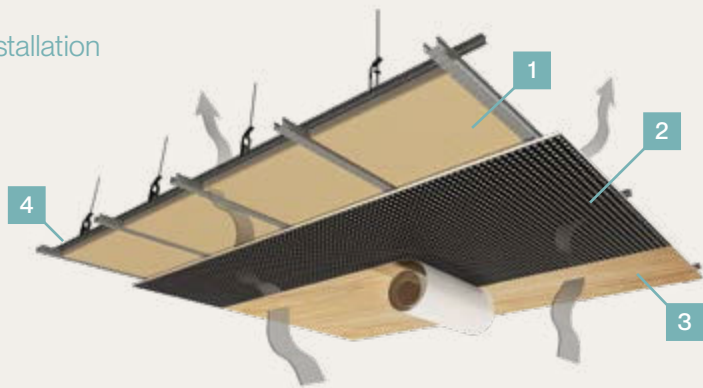

How Soundlina® works:

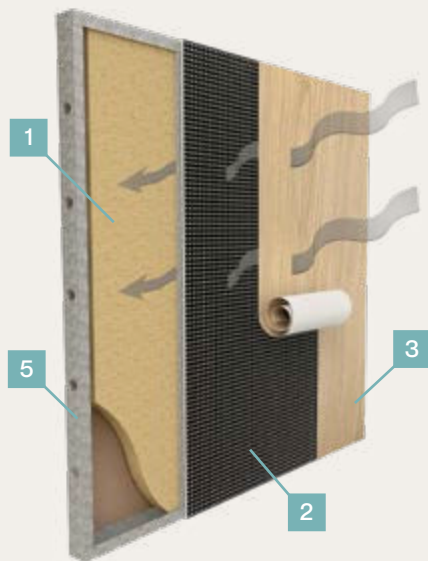

Soundlina® perforated wallpaper reduces echo by allowing sound to travel through its subtle perforations to the perforated plasterboard, where the acoustic insulation absorbs it.

Tested to achieve 0.85 NRC when installed as recommended on 12/25mm perforated plasterboard with acoustic insulation 14kg/m³ (see diagram below).

Ceiling installation

Wall installation

- 1 Acoustic insulation
- 2 Perforated plasterboard (painted black for aesthetics)
- 3 Soundlina® wall covering
- 4 Suspended ceiling system
- 5 Stud wall

A non-acoustic, perforation-free version, NAVURBAN Wall™, is available through our trusted partner, New Age Veneers.

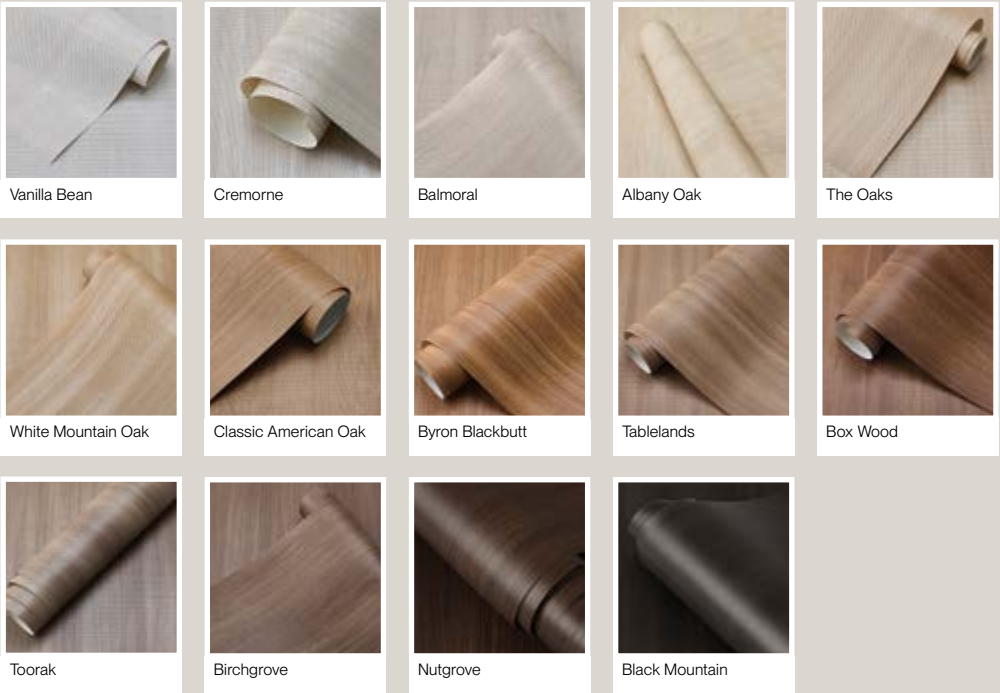

Soundlina® Range Overview

Soundlina® (PAT. PENDING) is a first to market perforated architectural wall covering with high acoustic performance and Group 1 fire rating.

Roll size: 0.6m x 9.85m

Effective cover: 5.91m²

Soundlina® is prefinished with NAVURBAN Diamond™ a UV stable, scratch, abrasion, stain and water resistant finish, ensuring longevity and durability.

Note: Digital and printed finishes should be used as a guide only. Please request a sample to confirm your selection.
